2019 - 2022	Ordinary Level in Math, Physics and Literature	Saint Bernadette

SKILLS

With extensive experience in both Frontend and Backend development. I specialize in creating scalable, efficient and user-friendly applications using a variety of modern technologies and frameworks.

Frontend Development:

- Proficient in TypeScript, React, and Next.JS for building dynamic and responsive user interfaces.
- Skilled in utilizing Tailwind CSS to design elegant, maintainable, and performance-optimized styles.

Backend Development:

- Experienced in Nest.JS and Django for robust server-side logic and API development
- Experienced with Prisma and Type ORM for efficient database management and backend services.
- Knowledgeable in GraphQL for creating flexible, powerful, and efficient APIs.

Database Management:

- Experienced with relational databases such as PostgreSQL, MySQL, and SQLite3.
- Experienced in using Redis for in-memory data storage and caching solutions.

Deployment and DevOps:

- Proficient in Linux for server management and deployment.
- Skilled in containerization and orchestration using Docker.
- Experienced with web server technologies like Nginx and application servers such as Gunicorn and PM2.

Deployment Tools:

- Skilled with Postman for API testing and development.
- Experienced with TablePlus for database management.
